

Tune — Ecosystem Build

Forecast · Residencies · 12 weeks embedded

A 12-week embedded residency to move from a validated prototype to an orchestrated ecosystem the org can run without us.

The three journeys

Narrative. You stopped needing us. The ecosystem now runs on your team's baton.

Cognitive. Ecosystem = product + governance + rituals + second-chair. Every piece has an owner and a retirement date.

Identity. From project team to system stewards.

Curriculum by module

Module 1 — Week 1 — Owners

40h · Love — Why this matters

Outcome: Handoff contracts signed.

Intent: Anchor on the humans who will run the ecosystem after us.

Prompt question: Who is the person who will own this in 12 weeks?

Exercise	Time	Prompt	Debrief
Owner Naming	90m	Assign owner + backup for every piece of the ecosystem.	Post to residency wall.
The Owner's Fear	240m	30-min interview per owner: 'What are you afraid you'll be left holding?'	Cluster fears. Address top 3 in week 2.
The Handoff Contract	120m	Co-draft: what will be handed off, in what shape, on what date.	Every owner signs.

Artifact: An owner grid. A signed handoff contract per piece.

Module 2 — Weeks 2-3 — Rituals

80h · Magic — The reframe

Outcome: Ritual retirement doc.

Intent: Reframe: an ecosystem is a set of rituals, not a set of features.

Prompt question: Which rituals will keep this ecosystem alive after we leave?

Exercise	Time	Prompt	Debrief
Ritual Inventory	120m	List: cadence, purpose, host, artifact, participants for each ritual.	Present to leadership. Get pushback.
Ritual Cost	45m	For each ritual: total hours consumed per month.	Sum. Ask: 'Can the org afford this?'
The Rituals Retirement	60m	Kill 30% of rituals. Justify each kill.	Publish. Notice the relief.

Artifact: A ritual inventory. A cost sheet. A retirement document.

Module 3 — Weeks 4-5 — Governance

80h · Calm — Organize complexity

Outcome: Constitution shipped.

Intent: Introduce the governance ontology.

Prompt question: *Who decides what, on what cadence, with what evidence?*

Exercise	Time	Prompt	Debrief
RACI-lite	90m	For each decision type: responsible, accountable, informed. No consultation column.	Publish. Get exec sign-off.
Cadence Map	120m	Which decisions weekly, monthly, quarterly? On what evidence?	Post next to RACI-lite.
The Constitution	240m	Draft: purpose, boundary, decision protocol, retirement clause.	All owners co-sign.

Artifact: RACI-lite grid. Cadence map. 1-page constitution.

Module 4 — Weeks 6-10 — Silent build

200h · Open — Pattern discovery

Outcome: Break-fix log + team-led retro.

Intent: Let the ecosystem run — with us in the room but silent.

Prompt question: *What broke when we stayed silent?*

Exercise	Time	Prompt	Debrief
Silent Weeks	900m	Attend. Take notes. Do not speak. Log what broke.	Weekly retro with the team — using notes only.
The Break-Fix Log	60m	Public log. Owner names the fix.	Notice which breaks the team fixed themselves.
The First Retro Without Us	90m	Facilitator: internal team lead. We only take notes.	Debrief privately with the lead.

Artifact: A break-fix log. A team-led retro record.

Module 5 — Weeks 11-12 — Exit

80h · Free — Commitment

Outcome: Exit ceremony + certificates.

Intent: Exit. Cleanly. On the date.

Prompt question: *What did we hand over and what did we take with us?*

Exercise	Time	Prompt	Debrief
The Exit Ceremony	90m	90-min ceremony. Handoff of every piece. Public celebration.	Video the ceremony. Post.
The 30/60/90 Check-in	90m	30-min video call at 30, 60, 90 days post-exit. Optional attendance for us.	Log what changed.
The Second-Chair Certificate	30m	Signed certificate: role, ecosystem, dates, handoff artifact.	Ceremony includes handing them out.

Artifact: An exit ceremony recording. 30/60/90 check-in schedule. Certificates.

Commitment contract

What does the ecosystem look like when we're gone?

On _____ the ecosystem will be owned by _____. Its constitution is _____.

The 30/60/90 check-ins are booked for _____. The retirement clause triggers when

_____.

Witness — The named steward of the ecosystem.
